Leonid Shagabutdinov, Resume

I'm looking for a **remote Ruby On Rails & React full stack developer** position. I'm the web developer with 10+ years of experience. I work with Ruby On Rails (5+ years), React (Javascript, 3+ years), Golang as highload language. Reach me out by the email leonid@shagabutdinov.com.

Skills

- Ruby, Ruby On Rails, Sinatra & Rack, RSpec, Capybara
- Javascript, React, Angular, Jasmine, Chai
- PostgreSQL, MySQL, Elastic, Redis, RabbitMQ, Cassandra
- Go for highload, Python for plugins
- Docker, Docker Compose, Kubernetes

Experience

diagonal.com, Senior Ruby On Rails Developer, August 2016 – present

Diagonalfilm is the market leader in Switzerland for online cinema delivery. I've set up continuous integration & delivery process, added more than 1000 test checks, completely refactored the delivery software. During my work here I refactored the main UI application to React and improved the response time and the customer's satisfaction. We delivered more than 100000 films & trailers to 300+ cinemas across Switzerland with more than 5000TB of data. I made three major software integrations with our partners (Disney & Deluxe) in London & Zurich. I've reduced delivery errors by factor 3.

idfly.io, Co-founder & Web Developer & CTO, September 2009 – August 2016

IdFly provided outsourcing from Siberian developers to the Moscow region. We did 20+ marketing projects for brands like Castrol, Sony, Nivea, Rexona, Bayer, and Gazprom. We also delivered the code for four startups (none of them are currently alive though). We collected 1 million users for "9fine" startup and reached $15k monthly revenue for "nalopatu". We grew our team to 10+ members, I've interviewed more than 50 people, integrated CI / CD pipelines & Docker to the development process.

Education

- The engineer's degree in computer science (Novosibirsk State Technical University, NSTU), 2006 – 2011
- Techpeaks - The People Accelerator, 2013
